

The moment of trust. The line was spec'd for 2,000 TPH, but the next load's way over that. And now routine maintenance has been delayed. Again. This is why you insisted on Timken.

With an enhanced bearing insert, double lip seals and e-coat paint on the housing and collars, the new Timken® Type E tapered roller bearing yields a 55% longer design life, 10x improved sealing* and better corrosion resistance-even under the toughest conditions. Further proof of what Timken expertise means to your business. And your reputation. [Learn more at timken.com/typeE](http://timken.com/typeE).

New Timken® Tapered Roller Bearing Housed Unit

*55% better design life than current industry leaders using standard Timken bearings and 10x improved sealing over competitor single lip products
